# USE CASE:

USMC Annual Rifle Qualification (ARQ)
USMC Combat Pistol Program (CPP)

In 2020 the USMC moved to the first new rifle qualification in 100 years. JMAP has been used to score the ARQ since its first rollout events.

Scoring an ARQ or CPP with JMAP is easy, requires almost no prep, and provides instant results (including MCTIMS export), along with detailed reports of shooter and unit performance.

HIGHLIGHTS

- No paper. No math errors.
- ARQ and CPP
- Works on any iOS/Android tablet or phone. Internet not required.
- Collects details on all hits, including photographic record of targets.
- Logs all scores and edits (helps prevent cheating)
- Easy- 2 minute class in the pits and off to the races.
- Charge tablets and use. Almost no post qual work - all information needed is instantly generated.
- Generates signed and verified scoresheets using CAC card scanning.
